

Strengthen Your Money Vibration

6 Week In Person Workshop

Are you as tired as I was of having your finances feel like a huge boulder you're carrying around on your back?

Even in the best of times money can feel challenging. The combination of how we perceive it's power plus what we believe about ourselves affects everything in our daily life.

How we feel around money changes how we earn, spend and manage it.

For years I've witnessed tangible, quantifiable changes in people's lives when they raised their vibration. At first I wasn't a believer - attributing it to coincidence. Even today I don't know why this is, but I do know how to do it. Once we raise our vibration, the universe responds and comes to meet us.

Begin now, wherever you are. You may be doing well but know you could do better. Or, maybe you're in a pickle and need to figure a way out.

Think of this as a moving sidewalk at the airport. You can walk and get to your terminal. You can stand on the moving sidewalk and get to your terminal. But if you walk while on the moving sidewalk you get there the fastest!

If you want your current situation to be better - START. HERE. NOW.

"I felt a difference right away in my life during and after Lisa's 6-week Raising Your Vibration workshop. Lisa surprised us each week with exercises to get us thinking up and outside the box and to jiggle the brain into thinking about money and success in a new way. Using Lisa's techniques, within 2 months I raised my vibrations and manifested one of the key goals I'd set during the course. I definitely recommend it!"

"Working with Lisa has taught me how to raise my finances as well as my vibration. Because Lisa has taught me that managing my money can be more enjoyable and easier than I ever thought possible, it has allowed me to stress less and actually spend more energy going out there and making even more of it!"
